Leggett and platt adjustable base reset

MATTRESS WAREHOUSE, INC. IS NOT RESPONSIBLE FOR TYPOGRAPHICAL ERRORS. PHOTOS ARE FOR ILLUSTRATIONAL PURPOSES ONLY. SOME ADVERTISED ITEMS ARE PRICED AT EVERYDAY LOW PRICES, OTHERS ARE SALE PRICES. WE MAY EARN A COMMISSION WHEN YOU USE ONE OF OUR COUPONS/LINKS TO MAKE A PURCHASE. If the adjustable base fails to operate, investigate the symptoms and possible solutions provided in the chart below: symPtom Remote control illuminates and appears to be operable, but will not activate base. No features of the base will activate. Remote control will not illuminate. Head or foot section will elevate, but will not return to the horizontal (flat) position. Excessive massage motor noise. solution • Verify power cord is plugged into a working, grounded electrical outlet. A grounded, electrical surge protection device is recommended. Test outlet by plugging in another working appliance. • Program the remote control (see Remote control Programming included with this manual for programming procedures). • Unplug power cord, wait 30 seconds and plug in to reset electronic components. • Electrical circuit breaker may be tripped. Check electrical service breaker box to verify. • Defective surge protection device or electrical outlet. Test outlet by plugging in another working appliance. • Replace batteries in the remote control. • Base mechanism may be obstructed. Elevate base and check for obstruction. Remove obstruction. • Head section may be too close to the wall. • If base is located on hard surface flooring, place carpet pieces or rubber caster cups under each leg or caster of the base. (See accessory sheet for rubber caster cup order information.) • Elevate the head or foot section a short distance (with the remote control) to realign the lif/lower mechanisms with the bed support platform. • Verify that the base is not positioned against a wall, nightstand, or other object that may cause vibration or noise. • If base is installed over a bed frame, verify massage motors are not causing bed frame (or bed frame components) to vibrate. Sleep Comfort™ Adjustable Base Owners Manual 99301076-b 21 Due to the ongoing impacts of COVID-19, our teams are experiencing significant delays in customer service response times. We apologize for any inconvenience and appreciate your patience. Request Support » Adjustable Bed Problems? We carry parts for most adjustable bed and power bases in order to get you back sleeping your best. So whatever issues your bed may be experiencing, we're just a phone call away.615-336-2875Parts & Service Center Hours Mon-Fri 10am to 5pm & Sat 10am to 1pmCentral Time CLICK HERE TO Return to home page Please watch our Self Help videos below to learn how to Repair Adjustable Beds and get the correct Adjustable Bed Parts. New Upgrade Kit for Okimat 2 Maxidrive Adjustable Bed Motors Replacement Okimat 2 motors for Tempurpedic, Leggett & Platt, Sleep Number, Drive Medical, Golden Technology & Craftmatic Adjustable Beds IN STOCK! Okin Maxidrive Raven Control Box ("J-Box") for Leggett & Platt and Craftmatic Sealy Titanium, Orthomatic, Adacel & Interflex Control Boxes. DISCONTINUED, MUST UPGRADE TO RAVEN CONTROL SYSTEM. Simmons Orthomatic 810 Control Box MUST UPGRADE Adjustable Bed Control System Upgrade Raven Control System upgrade for Orthomatic, Craftmatic and Interflex Adjustable Beds. Raven Jumper kit for Orthomatic, Craftmatic & Interflex Adjustable Beds. This part converts your bed motor's rectangular plug type into the new square 4 pin Raven connector. This allows your bed to be successfully upgraded without replacing your motors. Please take a look at the photo below in order to identify your Adjustable Bed Motor's Plug type. This helps us avoid errors in identification of your bed's motors and guarantees you receive the correct "jumper kit" with your Control System Upgrade. Note: If you own an Orthomatic, Interflex, or an early model Craftmatic Adjustable Bed, you must upgrade to the new Raven Control System. The problem is that either the manufacturer is no longer in business or the parts are obsolete and discontinued. This is why you MUST UPGRADE your adjustable bed's electronics.
